

# LUCIAD GEOSPATIAL SITUATIONAL AWARENESS

## FREE SEMINAR AND TECHNICAL TRAINING

Designed from the ground up to address challenges inherent in situational awareness, Luciad provides key building blocks that are used by leading companies worldwide to create accurate and high performance geospatial representations, applications and solutions.

Dedicated Systems together with experts from Luciad will be delivering free seminars and technical training sessions to customers around Australia.

The technical sessions are aimed at engineers and application developers seeking to enhance their understanding of how to develop situational awareness applications or migrate from legacy tools such as Google Earth.

The seminars will be useful to project managers and bidding teams seeking to understand how Luciad software can enable them to both manage projects and bid on future geospatial work.
