location analytics at scale

Geospatial analytics for large volumes of geospatial IoT and GPS tracking data.

Differentiators

Scales to billions of records.

Quickly build and share dashboards to communicate your insights.

Options include no-code, or automate and integrate using an API.

Dedicated Systems

20 Years

For over 20 years, leading companies have turned to Dedicated Systems to help them address the challenges of innovating, integrating and sustaining technology. Our customers build complex and critical systems, often deployed in challenging environments. Our best-of-breed products coupled with a team of highly experienced engineers help minimise risk, reduce total cost of ownership and improve outcomes.
